**Release Notes for 1/12/2017 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 126 4 Week Holiday Work Cycle)**

| Feature Title | Notes |
|---|---|
| | |
| WISEid: Change Middle Name update handling | In the UI if user attempts to change a person's more specific middle name with a single initial or single initial plus period that matches the existing first letter it will be ignored. We initial did the same for the Person upload, but had to reverse the change because a bug which was causing faults. We will fix and reenable in the future. |
| WISEid: Hotfix Create Change Request Button Missing for WISEid Admin Role | We found that the WISEid Agency Admin role was missing the rights to click the Create Change Request button when editing a person. This was fixed by a security hotfix. |
| WISEid: Reactivate eight student WISEid's identified by DWDS as part of WSLS shutdown | Part of WSLS shutdown we found 8 WISEids in WISEdata that needed to be reactivate in WISEid since they had data in WISEdata. |
| WISEid: Undo Merge UI (Button) Correction | We have 3 previous merges where a WSLS person was merged to a newer WISEid which shouldn't happen. We have enabled functionality to fix this issue correctly. |
| WISEStaff: Ack Warnings function broken | Ability to acknowledge warnings was broken. We have restored it to working condition. |
| WISEstaff: Audit - Insert Audit Results Into Audit Results table | Created functionality so that when Initial and Final Audit results are published they show up in WISEstaff under Reports / Validations > Audit Results. |
| WISEstaff: Bug Validate Staff Data Acknowledge warnings broken when no errors | When there are no other errors to resolve and only acknowledged warnings the checkbox for "Include Acknowledged Warnings" stops working to show the acknowledged warnings. Fixed so this checkbox works even in the situation where there are no error and info messages. |
| WISEstaff: Data Quality Check #10 - Entity ID Missing for Licensed Assignment Person Widget | Completed WISEstaff dashboard widget for missing Entity ID. Found issue where the list is not accurate for some districts which will be fixed in next 2 week work cycle. |

| | |
|---|---|
| WISEstaff: Improve Validation Performance for agencies making many file uploads | Improve validation performance by removing the saving of validation messages no longer valid anymore. This will solve problem for district uploading multiple Contract and Assignment uploads in the same week. |
| STAFF: Snapshot times out when run | Snapshotting process was timing out. We fixed issue so we can create snapshots more quickly for DPI Licensing to audit. |
| STAFF: Warning for multiple Principals reported at one school | Create validation warning for multiple Principals at the same school. There should never be two lead Principals. Usually the problem is Assistant Principals being codes as main Principal. |
| Staff: Duplicate Assignments on All Staff Report | The All Staff Report had certain assignments duplicated for persons. We fixed data issued that caused this. |
