

Release Notes for 11/23/2015 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 97 and 98 + Hotfixes)

Feature Title	Notes
WISEid: Add UI Parent / Guardian to WISEid / Create Person Screen	Added Parent/Guardian fields to the Create Person Screen for persons with Local Person ID type of Student. At least one Parent/Guardian is required when person is a student type. Add 'Parent Type' selection criteria of 'F' (father), 'M' (mother), 'Guardian) or 'O' (other)
WISEid: Download layout for new and modified fields in download file	Modified Person Upload format and download of original Person Upload files according to WISEidPerson File Format - see http://dpi.wi.gov/wisedata/vendors/filelayout-templates
WISEid: Manage Agency - Choice Schools created tabs for private vs public	DPI users can filter schools by Type now when they are looking of the district to act as in Change Agency.
WISEid: BUG - Suffix population	WSLS persons now have Suffixes correctly populated
WISEid: Separate Person and Staff specific link R / P - DPI Admin Tab	Created a new WISE DPI Administration tab and reorganized the administration functionalities.
WISEid: Enhance Match Review and Search Results to include new data elements	Adding to the Match Review and Search screens the new Parent/Guardian elements, Student vs Staff Local Person IDs, and Local Person ID Type of "Student" or "Staff".
WISEid: Update to Allow School Login	Adjustments to allow Choice Schools to login.
STAFF: Hotfix Bug when assignment code is not valid UI message for duplicate message broken	When user uploaded an assignment with no longer active assignment codes when they attempted to change codes

	<p>to those they were already using in another assignment for the same person there was a breakdown in the system. System could not handle this in the Assignment UI. We adjusted so the Assignments UI so it tells users that the Assignment is already being used for that person so user can either delete or choose another assignment code before the they save the change in the Assignment UI to prevent a duplicate assignment for that person.</p>
<p>Staff: Bug Job to populate Entity IDs broken</p>	<p>Turned out the job wasn't broken itself, but the job display was broken so it looked like it was broken. Fixed so DPI can see if the job is running on schedule or not.</p>
<p>STAFF: CMO enable 0000 agency wide school</p>	<p>Added 0000 agency for CMO. However, after testing we found we still need more CMO adjustments in next sprint to make CMOs work correctly.</p>
<p>STAFF: Bug WISEstaff tab Results</p>	<p>Clicking on WISEstaff Results changes the menu to the WISEid tab, but leave user still with WISEstaff tab selected. We fixed this so user is kept on the WISEstaff tab.</p>
<p>Staff: Contract Error WISEid column WISEid last digit covered by exclamation mark</p>	<p>On Contract Upload Results > Error Review page red exclamation mark for error in WISEid covered up the last digit so user could not see what the full WISEid that uploaded was. We fixed this issue by adding more padding on the WISEid column.</p>
<p>WISEid: Validate Winter Person Upload for new/modified Parent/Guardian data fields</p>	<p>First load upload error validation for new Parent/Guardian fields during Person Upload. Also, added requirement for Local Person ID and Local Person ID type of "Staff" or</p>

	<p>“Student”. If student at least one Parent Guardian is required.</p>
<p>STAFF: Contracts CESA 2 Contract Fault</p>	<p>CESA 2 was faulting with Contract Uploads. Fixed issue.</p>
<p>Staff: Hotfix Madison Assignment Upload Faults</p>	<p>Assignment Uploads were faulting for large districts. Changed Entity Framework so it splits uploads behind the scenes only to batches of 100 so system will continue to run with large uploads.</p>
<p>STAFF: CMO Contacts not working correctly</p>	<p>Fixed Contacts for CMOs. Found remaining issue with how CMO user was setup in ASM which will be fixed next sprint.</p>
<p>STAFF: Hotfix All Staff Report Assignment Codes are wrong</p>	<p>Assignment code 98-9896 was being displayed as 99-9896 in the All Staff Report. We found it was because report was using out of date table for assignment codes.</p>
<p>Staff Hotfix bug Manage Staff Data</p>	<p>Manage Staff Data was not working correctly and displaying right buttons for right users. Fixed permissions to make it work correctly.</p>
<p>STAFF: Hotfix Ability to add/edit other names</p>	<p>Some users with some roles including Agency Admin not able to Add/Edit Other Names in the UI. We fixed this issue so appropriate users can access.</p>
<p>STAFF: Run Statewide validation nightly after Entity ID ELO job runs</p>	<p>Setup nightly job after we update Entity IDs with new matches so we also run the Statewide validation so validation reflect the current status for Entity IDs 4034 errors.</p>
<p>WISEid: Add UI Parent / Guardian to WISEid / Edit Person screen</p>	<p>Added Parent/Guardian fields to the WISEid Edit Person screen. At least one is required for persons with Local Person ID type of Student.</p>

<p>WISEid: Deploy Require Local Person ID for all Districts SQL Script from US 36012</p>	<p>Now all districts are required to include Local Person IDs when they upload staff or students from now on. Old setting to turn off is removed and set to required.</p>
<p>WISEid: Bug - Creating person through UI</p>	<p>Fixed bug when creating a person through UI, if the user does not enter Local Person ID type at first then the record isn't saved. However if all information is entered and then save is hit, the record is saved. Added error message to have person select the correct Local Person ID type before save will be allowed.</p>
<p>Staff: hotfix Audit Snapshot Contract Data from last year</p>	<p>Audit snapshot is snapshotting last years contract data in some cases. This is fixed for future audit snapshots. We also fixed before statewide snapshot, but contract data in audit snapshots up to this fix are not usable. Does not affect audit so we are OK with this.</p>
<p>WISEid: Submit and Resolve Duplicate broken for some users</p>	<p>Some duplicate WISEid person that were reported were not resolvable. We fixed this issue and DPI Customer Services will process these after this update.</p>
<p>WISEstaff: hotfix Validate Staff Data Ok Warnings and Clear Non-Required Data broken</p>	<p>Validate Staff Data was broken so user couldn't OK Warning and the Clear Non-Required Data button was broken. We fixed this issue.</p>
<p>STAFF: Fix two data columns in PositionAreaHistory table on DPIMaster</p>	<p>Found the WMAS and ESEA columns were not correct in production. This resulted in incorrect Highly Qualified Teacher audit results for last year. Corrected in tables so it wouldn't happen for this year. We had to manually to recalculate the Highly</p>

	Qualified Teacher status for last year.
WISEid: Fix DPIAdmin tab so that it only displays for only DPI Admins	Secured WISE DPI Administration tab so only DPI admins can access.
WISEid/WISEstaff: Saving invalid contact still creates/updates contact record	Added UI Update Contact Info validations so it informs users of problems to fix with a contact before it saves.
WISEstaff: Saving assignment without valid grades does not fully refresh assignment questions	When user changes an assignment in the Assignment UI it doesn't inform the user on clicking Save that there are validation errors with that assignment. Now when user clicks save in the Assignment UI it runs the validations and keeps you on the page and refreshes validations so the user can fix the validation problems.
WISEid: Fix Manage Position, Area, PositionArea so that user can edit Data	DPI lost ability to modify Assignment configurations correctly. This fix restored that ability.
WISEstaff: Allow AllStaffReport to users with viewAgencyReportsStaff	Most users lost the ability to see the All Staff Report. We fixed this issue by adjusting role privileges.
WISEstaff: Bug Peshtigo District Assignment Upload Faults	When user uploaded WISEids with Scientific Notation text in the fields it caused an Assignment Upload fault. We now block the rows with this problem as first level upload validation error #4002. User would need to correct back to a 10 digit WISEid and reupload problem rows.
WISEid: Fix CMO Assignment Grades list to not have duplicates	Fixed an issue with Assignment grade levels for CMOs.
WISEid: Entity ID not editable in UI by DPI roles	DPI lost ability to edit Entity IDs.
WISEstaff: Contract Upload Errors for Southwestern district create server error	Fixed an issue where user was getting 500 Internal Server Errors when they

	<p>tried to view Contract Upload Errors.</p>
<p>WISEstaff: All Staff Report Position Description is not pulling from Position Area table</p>	<p>The All Staff Report for some assignments was displaying incorrect Position Descriptions for code 98-9896 and a few others. Fixed this issue that was caused by database table update issues.</p>
<p>WISEid/WISEstaff: Search results Local person ID Type</p>	<p>Made the display on the search screens to show the Local Person ID Type from only agency the user is logged in under.</p>
<p>WISEstaff: Snapshot an Agency that has a Merged record to another Agency</p>	<p>Fixed snapshot so it behaves correctly when a WISEid is marked inactive due to a merge and assignments and contracts become inactive due to the merge.</p>
<p>WISEid: Adding a duplicate contact type does not cause error message to be displayed</p>	<p>Created validation messaging when user tries to enter duplicate Primary or Secondary contacts for WISEid or WISEstaff tabs.</p>
<p>WISEid: Save Edit Cancel buttons Person Edit page UI</p>	<p>Fixed a privilege issue with Person Edit page in the UI for the Save, Edit and Reset buttons. Now correct users get correct buttons and they work as they should.</p>
<p>WISEstaff: Upload 98-9896 should not convert to 99-9896</p>	<p>Assignment Uploads of 98-9896 were getting converted to 99-9896. We fixed the issue, but districts must verify their previous 99-9896 assignments to make sure they are correct and not converted incorrectly due to this bug.</p>
<p>STAFF: Hotfix Clearing out of contract data from Assignment save</p>	<p>Found the Clear Non-Required Data was running on Assignment UI Save for all assignments in the select hiring agency. We removed this as the function should only run when the user wants it to run. Next sprint we will put</p>

	<p>back clearing of non-required grades on the specific selected assignment only at time of save which is what we had originally planned to have..</p>
<p>Staff: Upload Assignment remove clear non-required data</p>	<p>Removed running of the clear non-required data when an assignment file is uploaded. Never intended to do this. Should only run when district wants to run it under Validate Staff Data - Clear Non-Required Data button.</p>
<p>Split WISEid tab and WISEstaff security</p>	<p>With this release we separated security roles for WISEid tab and WISEstaff tab. As a one time conversion we gave all users with old WISEstaff roles the same level of roles in both the WISEid tab and the WISEstaff tab. From now on new users will have to be setup with both tab roles in mind. If a user does both staff and WISEid work they will need a role for each tab. If an user only works with WISEid they should only get a WISEid role.</p>
