Release Notes for 2/1/2016 WISEid/WISEstaff Production Release (WISEid Core Apps Sprint 101)

Feature Title	Notes
STAFF: DPIAdmin Ability to handle Fall and Spring District Certifications	Ability to do the final certification for the staff collection. This box is separate from the initial certification already done.
STAFF: Put file specifications link on the Upload page	On WISEid and WISEstaff tab the Upload page in the first blue arrow section there is a link to the detailed file specs for all upload file formats.
WISEstaff: Move "Copy forward Files" to the top of the Manage Staff Data Screen	Moved Copied Forward Files section to top of the Manage Staff Data page to ease access since it is used frequently.
WISEid: [Performance] Improve concurrent search performance under load	Improved performance of the Person Search screen in the UI.
Staff: Split Contract and Assignment during Undo Merge	DPI function to allow DPI to faster process the Report duplicates reported by agencies.
Staff: Highest Degree validation comparison across hiring agencies	New validation rule that checks the Contract Highest Degree validation between agencies to identify inconsistent data. Agencies must work together to have this field be the same between districts for Contracts.
WISEid: Improve Person Upload saving performance with sql bulk copy	Improved the Person Upload performance while doing save of data.
WISEid: Improve Upload Person Job's Create/Update person job performance	Improved the Person Upload job processing performance.
Staff: Update MessageBusiness to use bulk sql copy and bulk sql update	Improved Validation Messaging performance.
FTE Race Gender Report - DPI agency statewide	Added method for DPI to run the FTE Race Gender Report statewide.

WISEid: Going from Results Potential Matches to Review Matches hides matches	When a user went into a specific downloads potential matches and then navigated to the Review Matches menu the user would only see potential matches for the single download and not agency wide. We fixed this issue so the Results link in the WISEstaff tab always shows all potential matches agency wide.
STAFF: Hotfix Elementary All Subjects for existing records missing in UI	Some assignments when editing in the Assignment UI are missing the Elementary All Subjects question. This has been fixed. You may have validations about missing Elementary All Subjects fields and if so you will have to populate.
STAFF: Validate Staff Data - Clear Non-Required Data problems	A number of Info messages were not resolved by the Clear Non-Required data function. This has been resolved to clear info messages.
WISEid: Upload person validation job is taking too long too complete for large files	Entire person upload validation was slow for large files. The larger the file the slower it became. Change method of processing and it is much faster. The end result is faster Person Uploads.
