

Release Notes for 4/19/2022

IB Validation Rule Revisions

[Validation rule 7173](#) was revised to make it clearer that the rule applies to when a school has IB Diploma Programme courses but not sections for all of the courses.

[Validation rule 7174](#) was modified to check for missing IB Middle Years Programme data only if the course is associated with grade levels 9-12, while similar validation rule 7175 was modified to check only if they submitted the course but do not have grades 9-12.

[Validation rule 7176](#) was revised to make it more obvious to users that the rule applies when a school is missing course section data for an IB Primary Years Programme.

[Validation rule 7177](#) was revised to make it clearer that the rule applies to when a school has IB Career-related Programme courses but has not submitted student sections for all of the courses.

World Language Rule Revisions

The [validation rule 7121](#) will end at the end of the 2022 school year and be replaced with the new rule [7188](#), both of which flag when schools try to submit a “General” World Language course code when they should submit a specific language code instead.

New [validation rule 7190](#) has been implemented to warn schools when they may be misreporting a Content-based World Language Program that’s for the wrong grade level; this one flags for content courses over grade level 6.

Similarly, new [validation rule 7192](#), much like existing rule [7165](#), has been implemented to warn schools when they may be misreporting a Facilitated World Language Study program for the wrong grade level; this rule also flags for courses associated with grade levels over 6.

Bug Fix

- Fixed [validation rule 7172](#) so it’s no longer flagging for issues reporting IB when the school doesn’t offer IB programs.
