

More New Validation Rules in World Language Program Courses for 22 - 23 SY:

NEW Validation Rules [7193](#) and [7440](#): These validation warnings occur specifically for courses using the 'SLWL' course code, Secondary Level World Language. These courses can be offered to students in grade 6 and up, but must be offered to students in grades 7-12. World Language courses can be offered to students in PK - grade 5, but these errors will throw if courses offered to students younger than grade 6 are used with course code 'SLWL'. Please refer to the Programs Data Element page for more details.

L2 Performance Maintenance: Warnings [6614](#) (sSEPA missing) & [6756](#) (homeless identification), errors [6569](#) (multiple enrollment records) & [7139](#) (educational environmental setting) have all received performance testing and are working smoothly.

Bug Fix: We resolved a glitch where the "HomePage Icon" was broken on WISEdata Portal. It occurred for Vendors when Count=0 and ErrorCount>0. It is now working properly.
