

Release Notes for 5/3/2022

Revision to Validation Rule 6773:

- [Warning 6773](#) logic was modified to better identify issues with course performance based indicators in that it will now check across terms if multiple grades are submitted. The revised rule will only throw now if a performance based indicator goes from pass to fail or vice versa.

Bug Fix

- We resolved a glitch where the “Data isn’t current” validation message alert banner remained on the WISEdata Portal screen after the issue was fixed.
