RELEASE NOTES**

Ver #	Data Elements	Notes	New/ Modifications
P#3.0	/student (studentCharacteristics array)	As of 2016.07.19 - 'Negligent and Deliquent' was originally on this list but is removed now. It will appear in the UAT 'sandbox' until a deployment removes it.	Modifications since P#1.0
P#3.0	/student limitedEnglishProficiencyDescriptor	2016.07.19: it was in question whether the location of this property would change. It will stay where it is. Same as original deploy for Choice.	Modifications since P#1.0
P#3.0	/studentSpecialEducationProgramAssociation wiDpiFapeResponsibleSchoolReference	Added to core /studentSpecialEducationProgramAssociation resource.	Modifications since P#1.0
P#3.0	/studentSpecialEducationProgramAssociation (wiDpiStudentSpecialEducationProgramAssociationDisabilities array)	Added to core /studentSpecialEducationProgramAssociation resource.	Modifications since P#1.0
P#3.0	/studentSpecialEducationProgramAssociation wiDpiParentPlacedPrivate	Added to core /studentSpecialEducationProgramAssociation resource.	Modifications since P#1.0
P#2.0	JSON Resource - /Students Property - residentdistrict	residentdistrict data property is now part of Students JSON Resource	Modifications since P#1.0
P#2.0	JSON Resource - /Students Property - visas	visas data property has been added to Students . This is an existing data property in ED FI Students Resource	New (since P#1.0)
P#2.0	JSON Resource - /StudentSchoolAssociation Property - programscheduleDescriptorType	1. programschedule is now a Type and not a Descriptor 2. programscheduleType data property is now part of StudentSchoolAssociation JSON Resource. We recently received direction from EdFi suggesting that we add any new data elements(that are not part of out of the box Ed Fi) to the already existing JSON Resources VS adding them to the Extension.	Modifications since P#1.0
P#2.0	JSON Resource - / StudentProgramAssociations	StudentProgramAssociations JSON Resource which is a part of the Ed Fi model is added	New (since P#1.0)
P#2.0	JSON Resource - /StudentProgramAssociations Property - educationorganizationreference		New (since P#1.0)

RELEASE NOTES**

Ver #	Data Elements	Notes	New/ Modifications
P#2.0	JSON Resource - /Students Property - economicDisadvantaged	economicDisadvantaged is 'Always Required' (Col	Modifications since P#1.0
P#2.0	JSON Resource - /Students Property - races	races is 'Always Required' (Column D)	Modifications since P#1.0
P#2.0	JSON Resource - /StudentsAcademicRecords Property - diplomas	diplomas is 'Always Required' (Column D)	Modifications since P#1.0
P#2.0	JSON Resource - / Student Property - limitedenglishlanguageproficiencydescriptor	This is still under discussion . SIS will be sent updates once a decision is made	
P#2.0	JSON Resource - / Student Property - privateschoolchoiceprogramparticipant	This has been removed from the document. This is only required by Choice schools and not by Public	Removed (since P#1.0)
P#1.0	NA	<p>1. The objective behind providing this document is to give you all a general idea of scope. While the out of the box resources and properties will be in Swagger, our additional WI extension endpoint/properties and additional descriptors / types (that are being expanded) will not. We will begin work in May to get these and the API changes out and published to the sandbox UAT environment</p> <p>2. This document contains list of Resources and Properties for Public. There are several elements that are common for both Choice and Public. Since a number of SIS vendors work with both, to facilitate compare and contrast between the two and to help identify what is similar and what is new for 'public' - choice requirement (Y/N) and Public requirement (Same as choice/ Modifications/ New) columns have been added</p>
