No Location Release	Required	Varchar/Text	1	Allowable values should be Y or N. Y= Yes, No Location Release, meaning the person's location of enrollment or employment is subject to special filtering. N= No, location of the person's enrollment or employment is not restricted beyond ordinary security restrictions. Indicates that a person is part of a privacy program protecting the person's location, such as the Safe at Home or another program. The No Location Release indicator is connected to the WISEid. Implementing No Location Release privacy protections in the DPI systems will hide Local Person ID associations other than the viewing agency in WISEid and hide enrollments in WISEdata Portal other than the selected agency. If a WISEid has the No Location Release indicator set to Y, the overall WISEid record will be considered Y regardless of whether or not subsequent uploads by any agency have it set to N. Only DPI CST can manually reset this indicator to N by a manual change. This indicator can also be set to Y if it's in WISEdata collections with a Program Association for No Location Release set to Y in the current collection year. We would recommend vendors use the same field that triggers the No Location Release indicator in both WISEid and WISEdata collections.
WISEsecure Role	Optional	Varchar/Text	50	Indicates a person's WISEsecure role, which is connected to the Local Person ID and Email. Allowable values are: Educational Support, Teacher, Special Ed Director/Designee, Principal/Designee, Student, None. Null will convert to "None" role. Access to update this field requires a WISEstaff "Agency Staff Admin" security role in addition to a WISEid role with create/edit ability.
