

Release Notes for 10/5/2021

WISEdata Portal

Update to Agency Contacts Page

The Agency Contacts page now displays all active WISEdata contacts for all active WISEdata Portal school years. Contacts' areas of interest and snapshot acknowledgement responses also appear.

New Validation Error for Certificated Program Status Type

[Validation error 7164](#) has been added to help verify that a certified program submitted for a student is submitted with its [certificated program status type](#).

Bug Fixes

Bug fixes in this release include:

- Fixed an issue that caused the validation queue to stop and fail to complete a validation run.
- Fixed an issue that caused the Course Offering export to show 0 in the Staff Count column when it should not.
- Fixed an issue that could cause the Student Section Association WISEdata export could time out before it completed generating an export file.
- Fixed an issue that caused [validation error 7139](#) to appear for students it is not supposed to apply to.
- Fixed an issue that caused [validation warning 7149](#) to appear for students who are not in grade K4.

WISE Webpages

New Page for Multi-District Charter School Reporting

Partnering districts in a multi-district or consortium charter school arrangement can encounter additional complexity in reporting data about participating students. To help you navigate this reporting challenge, we've published [detailed guidance on multi-district charter school data reporting](#) on the DPI website, available through the [Reporting Uncommon WISEdata Situations](#) page. Please review this page for an overview of how to report participating students' data to DPI through WISEdata.

New Page for WISE Application Release Notes

Here is our [new page for all WISE application release notes](#), including WISEdata, WISEid, WISEstaff, and other application updates. This page will also be kept up to date with new guidance pages or significant updates to other WISE application pages. We recommend that you bookmark this page and check back often to learn about updates to WISE applications and documentation.
