

WISE Application Release Notes 10/3/2023 (Sprint 1092)

WISEdata Updates

WISEdata Portal: Critical Errors

On the WISEdata Portal (WDP) Agency menu, Validation Messages screen a new checkbox is being made available for Critical Errors. Checkboxes already exist for Errors and Warnings, but this new checkbox option will specifically display a list of critical errors.

As a reminder, critical errors are the most severe type of validation. All data corrections, for all types of validations, must and can only be corrected by the LEA within their student information system (SIS) vendor tool; WDP is a 'read-only' application.

- Critical errors are data that flowed from your SIS into WDP, but that cannot flow into WISEdash (also referred to as the data warehouse – DW). Snapshot data is retrieved from WISEdash, so critical errors must be resolved if this data is to be represented in an LEAs snapshot data. Once a snapshot occurs, the data in that snapshot cannot be edited.
- Errors are data that flowed from your SIS to WDP, but it doesn't look right. Errors may need to be resolved with the help of other LEAs (e.g., overlapping enrollments).
- Warnings are indicators of questionable data. Frequently, warnings will throw around "0" data or "100%" data (e.g., 100% perfect attendance, or zero discipline incidents). This data should be reviewed, as it could very well be correct. If it is correct, acknowledge the warning.

WISEdata Portal: Removing State Endorsed Regional Career Pathway Status

The “State Endorsed Regional Career Pathway Status” (SERCP) data element was deprecated upon completion of the 2019-20 school year. Since this data element has not been used for a number of years and is no longer relevant, it is being removed from the few places where it is still visible on WDP:

- WISEdata Portal Exports, “Validation Message – Other Programs”: The column for SERCP is being removed from this export.
- CTE Program Ed-Fi API View & the User Interface: for the programs listed on a specific Student Detail screen.

CTE Program Ed-Fi API View

This view only shows CTE program associations from your agency.

WISEdata Portal: Removing Export Type 'Possible Full-Term Dropout' and 'Possible Mid-Term Dropout'

The exports named are being removed from the WDP Exports section because they no longer exist. Additionally, LEAs use WISEdash to review this data, and Choice schools use the 'WISEdash Extracts' export to review this data.

Category Type	Export Type	Description	Code	Code
ChildCount	Child Count	Student enrollment records submitted by your district that cover the October 1 Child Count	Download	Definitions
Discipline	Discipline Action Export	The details of the Student Discipline Actions that resulted from a Discipline Incident.	Download	Definitions
Discipline	Discipline Incident Export	The details of the Discipline Incidents and student behavior details from the Student Discipline Incident Behavior Association.	Download	Definitions
Dropout	Possible full-term dropout	This Drop out export no longer exist and Public school must use WISEdash for dropout review and Choice schools use the WISEdash Extract for Dropouts		
Dropout	Possible mid-term dropout	This Drop out export no longer exist and Public school must use WISEdash for dropout review and Choice schools use the WISEdash Extract for Dropouts		

WISEdata Portal: Bug Fix

A bug was preventing Third Friday in September (TFS) data from flowing into the data warehouse. A fix was put in place and LEAs should now be able to view this data.

Ed-Fi Updates

NSTR

WISEdash Updates

WISEdash for Districts:

- New data has been posted in the Target Group Preview Dashboard.
- 2022-2023 Growth Results have been posted to the Growth dashboards.
- 2023-2024 STAR data is now entering WISEdash for Districts for those districts that have opted in to have DPI load such results.

WiSFIP: Edit the Pupil Count Category Handle for Residency Status

LEAs were sending student enrollment records with the Residency Status marker 'R', but these students were not being reflected in their headcounts on WiSFIP. The

portal was adjusted so that when the Residency descriptor status is either not supplied (i.e., left blank) or submitted with the value 'R,' the handle of 'R-HC' appears, indicating the student should be included in the Resident Head Count. This change will be occurring across all applicable tabs within WiSFIP.

WISE Webpage/Documentation Updates

WISEdata and Data Elements

Teeny tiny updates to [Uncommon WISEdata Situations webpage on Student Taking up to Two Classes](#) and [Roster: Info, Help and FAQ \(Who Submits Roster? Section\)](#) to clarify data reporting requirements for homeschool students taking up to two classes in an LEA that is participating in the Pupil Count for Membership pilot program for the 2023-24 school year.

[Help Ticket Tips webpage](#) and [Credential Type data element webpage](#) updated to include a link to [GED/HSED Resources](#) so that this contact information is more available.

Help Tickets now all have an identical appearance:

WISE Help Ticket

NOTE: Do **not** submit any Sensitive Personally Identifiable Information (SPII) through this form.
[List of SPII examples](#)

- Required fields are marked with an asterisk(*).
- Visit the [Help Ticket Tips Page](#) for information about creating a secure Help Ticket.

KBAs for Validations

Validation Error 7478

[Error 7478](#) is a new validation that encompasses and replaced errors 6974, 6975 and 6976. This error throws when languages submitted are no longer used, or are listed on the “Obsolete Language Table,” which is linked on the [Native Language data element page](#).

Validation Warning 7480

[Warning 7480](#) is a new validation that throws when a new ELP code is submitted or when there is a change in the ELP code by a Choice school with no available data in the prior school year from ACCESS test scores.

CST and Other WISE Webpage Updates

The Internet Access at Home Survey has been translated into two additional languages: Hmong and Ukrainian. The survey can be located on the [Internet Access at Home DPI webpage](#).
