

WISEdata Release Notes 12/13/22 (Sprint 1072)

L2 Validations -

- Error 7461 - This is a Career Ed related validation error that will replace 7164 in March 2023; a KBA will become available at that time. Error 7461 will be applicable for the 2022-23 school year and 7164 will apply to data from the 2021-22 school year and prior school years. These L2s are very similar - they will throw when a student associated with a certified/certificated CE program type sufficiently attempts a class. However, 7461 'upgrades' the Logic to ensure there is also a certificated program status indicator included.

WISEdata Portal (WDP) Updates -

- **Bug Fix:** The CTE course matching course code 10019 has been added and aligned SCED 9.0 for [2022-23 school year courses](#). Originally, this course was missed when courses were being aligned.
- **Bug Fix:** Validation Message Tags were re-appearing on the WDP Validation Message screen, even after they had been removed by clicking on the 'x'. This has been resolved, and tags that are removed by clicking the 'x' are now staying removed.
- **Bug Fix:** A fix was provided for login credentials on EdCred when a user was associated with multiple Choice schools, and some of the schools were closed.

WISEdash Updates -

- **WISEdash Public** - Discipline dashboard: The text provided in the discipline metrics was adjusted to explain the information more accurately.
- **WISEdash for Districts** - Attendance dashboard: Notes were adjusted in the "Average Daily Attendance/Membership" section to explain the data gaps in this area due to pandemic reporting.
- **WISEdash for Districts** - Snapshots dashboards:
 - Year-End Completion now displays data for the 2021-2022 school year.
 - A new snapshot dashboard was created starting with 2022-23 school year data - the Child Date Child Count (CDCC) snapshot dashboard combines data from the October 1 Child Count data and the Third Friday of September data.
