

WISEdata Release Notes 1/24/23

WISE Webpage Updates

- On January 31st, the [WISEdata Events Calendar](#) will get a new name and a new location - the URL is remaining the same.
 - The current name, WISEdata Events Calendar, **will change to “WISE Events Calendar”** to more accurately represent the many events and trainings that are posted.
 - The current location of the Events Calendar is nested under the [WISEdata Help menu](#). The future location will be nested under the [WISE menu](#).
 - Again, the URL for the Events Calendar will not change.
 - Changes to the name and location will occur on January 31st.

WISEdata Portal (WDP) Updates -

- Data for the 2020-21 school year is now Read Only on WISEdata Portal, due to the completion of the December 6, 2022 snapshot.
- The ‘Schools’ filter on WISEdata Portal now lists schools in alphabetical order. The ‘Schools’ filter is located on the following pages in WISEdata Portal:
 - School Roster Details
 - Data Quality
 - Validation Messages
 - Student Search
 - Exports

Bug Fixes:

- Another error was resolved around course code 10019 - AP Computer Science Principles. This course has now been added to the SCED 9 course list (Roster Code 6458) as a non-CTE course aligned with SCED 9 code 10019E. This course is now available as a CTE course and as a non-CTE course. For the 2023-24 school year, this course will be mapped BOTH as a CTE (CTE indicator as “Yes”) course, as well as a non-CTE course, properly aligned with all associated rigor levels. SCED 9 is active for [2022-23 school year courses](#).

- The API view of discipline actions was not displaying accurately - it was not displaying all discipline actions, nor was it displaying all behaviors. A bug fix was conducted to repair this and both discipline actions and behaviors are now displayed correctly.
- The “Queue Import and Validation “ button on the WISEdata Portal Home and Validation Message pages have now been synchronized. Once the queue has started, the status will display the same on both pages.
