

# WISEdata Release Notes 2/7/23

## WISEdata Portal (WDP) Updates -

- **The 2020-21 School Year is now Read Only in WDP:** This is a reminder that data for the 2020-21 school year is no longer being displayed on WISEdata Portal, due to the completion of the December 6, 2022, snapshot. Vendors can obtain the data as Read Only. Validations for this school year have stopped running.
- **FDS/LDS Data:** Starting with the 2023-24 school year, the First Day of School (FDS) and Last Day of School (LDS) will be collected by SIS vendors and displayed in WISEdata portal. DPI will pull the FDS/LDS data from WISEdata portal to display them in School Directory. This data will be populated at the school level. Stay tuned for data element pages to be published soon!
- **CTE Course Collection:** The error surrounding the CTE course 10019 that was left out of the course code for the 2022-23 school year has been updated and included in the Course Code list for the 2023-24 school year.
- **L2 Updates for the 2023-24 School Year:** A number of L2s are getting updated for the 2023-24 school year.
  - [Error 7460](#) is replacing [Error 7154](#) due to changes in the Digital Equity Survey questions that started with the 2023-24 school year while following the same logic as Error 7154. Error 7154 is for the 2022-23 school year and prior.
  - [Error 7465](#) is replacing [Error 7092](#) for the 2023-24 school year. Error 7465 follows the logic of Error 7092, but has been updated to match the changes in residency codes for Choice schools.
  - [Error 6719](#) has been updated to 'version 3' which provides more comprehensive logic. This error is received because an LEA submitted a student with an Exit Type of PCC, TNC, TOS, or INM, but the student has since been associated with a new enrollment in WISEdata since his or her exit from your school/district.
- **Bug Fix:** The Roster panel Grading Period header on WISEdata Portal was not displaying when there was only a single section of a course for a grading period. This has been resolved so that now the header is displayed for the section, regardless of whether or not data was entered for that single section or not.

## WISE Webpage Updates

- **School Directory pages get new URLs:** The School Directory family of webpages nested under [the Customer Services page](#) have all received simplified and updated URLs. The following hyperlinks will direct you to [the School Directory landing page](#), the [School Directory User Guide page](#) (including [Mailing Label Source for School District Administrators](#), [School Districts by CESA](#) and [School Districts by County](#)), the [School Modification Form page](#), and the [Reassignment of School Codes page](#).

- The [WISEdata Snapshot Preparation Guidance page](#) has been updated with information for the Spring Snapshot, occurring on May 23, 2023. Corresponding to this, the [WISEdash for Districts About the Data - Snapshot Dashboards page](#) for the [Spring Demographics Dashboard](#) has also been published.
