

WISEdata Release Notes 5/2/23 (Sprint 1081)

WISEdata Portal (WDP) Updates -

Changes to Column Descriptors in Validation Message Grid for Discipline

Due to Ed-Fi's deprecation of the "student discipline incident association ID" endpoint, some of the column identifiers on the validation message grid are being renamed.

- Incident date is being replaced with Discipline Date.
- Incident ID is being removed and not replaced.
- Other columns (Aging, Last Name, First Name, WISEid, School, Action ID and Tags) will remain the same.

Fix Primary Nighttime Residence Value on Homeless Program:

- WISEdata Portal was displaying the API view descriptor text:
 - "HomelessPrimaryNighttimeResidenceDescriptor: Short Descriptor"
- This bug has been fixed and WISEdata Portal is now displaying the correct values:
 - "True" or "False"

WiSFiP Pupil Count Module -

The LEA page of the Pupil Count Module has been updated with the following changes:

- An "information" icon has been added to the question: "What are the total hours of instruction during the first semester for 4-yr-old in KG?"
- The information button will display text from the ["Four-Year-Old Kindergarten Outreach" DPI webpage](#), defining options for the number of hours of instruction available for 4K.
- Below this are two choices displayed as checkboxes (formerly a drop-down). LEAs can only make one selection:
 - FTE 0.5 (437 instructional hours)
 - FTE 0.6 (437 instructional hours + 87.5 parent/family outreach = 524.5 total hours)
