

WISEdata Release Notes 5/31/23 (Sprint 1083)

WISEdata Portal (WDP) Updates -

New Ed-Fi Credential Report Displaying Data Flow Issues

The [Ed-Fi Credential application](#) is the API that allows for the transfer of data from an LEAs Student Information System (SIS) to the DPI (**DPI *never* has the ability to change data in an LEA's SIS**).

- Now in the Ed-Fi Credential application, on the Admin Reports screen, DPI staff will have access to a new report that identifies when an agency's data isn't flowing due to how their API is set up. (***This feature is only viewable to DPI staff.***)
- The new report is named: LEA with Multiple Credentials.
- This will allow DPI staff to help an LEA properly configure a vendor subscription and get the data flowing properly from the SIS to DPI.

First Day of School/Last Day of School in WISEdata Portal

First Day of School (FDS) and Last Day of School (LDS) will be collected in WISEdata Portal for the 2023-24 school year! You can find detailed information on the [FDS/LDS data element page](#).

Along with this change, there will additionally be an option within WISEdata Portal to view FDS/LDS information from previous school years.

- FDS/LDS information is viewable on the **Agency Contacts** screen (you can locate this screen by clicking the expander icon by your username in the upper right corner).
- Under the Agencies banner a School Year filter will be added.
- The active school year will be the default display, and it will show the:

(Active School Year)							
LEA ID	LEA Code	LEA Name	School ID	School Code	School Name	First Day of School	Last Day of School

- FDS/LDS dates will be updated based on the selected year.
- These dates will be displayed for the 2023-24 school year and years ahead; FDS/LDS dates will not be available for the 2022-23 school year and prior.

Prior Year Enrollment in Descending Order:

LEAs will be able to view prior year enrollments in **true** descending order. Currently in WISEdata Portal, the prior year enrollment records are all listed – but displaying the immediate prior year at the **bottom** of the list (i.e., If the current year is 2022-23, Prior Year Enrollments are listed: 2019-20, 2020-21, 2021-22). This touch of continuous improvement lists the prior year's chronologically, with the most recent prior year listed at the top of the list (i.e., If the current year is 2022-23, Prior Year Enrollments are listed: 2021-22, 2020-21, 2019-20).

Performance Improvements Continue:

Upgrade-related changes around the API v6 continue to remain in place for the 23-24 SY. This upgrade will improve performance for our users. Examples include:

- Reviewing and creating new validation messages
- Enhancing user interface
- Working out bug fixes in WISEdata Portal
- Additionally, we are making some improvements to WISEdata Finance to help with the performance and responsiveness of that application for users.
