WISEdata and Ed-Fi Updates

Final Stage of Testing API v6 in WDP

DPI has conducted one final “end to end” (E2E) testing scenario to ensure the V6 API upgrade is working correctly within WISEdata Portal for the 2023-24 school year. This type of testing simulates real-world data flow from the end user’s perspective. All testing passed. We are go for launch!

Displaying Last ELP Code on Student Details Screen in WDP

When you look up an individual student in WISEdata Portal (WDP), their demographic data is visible on a specific Student Detail screen. We are adding a new item to this screen, which is the last reported ELP code. This information is imported into WDP, so LEAs will not have to enter it. This ELP Code will help LEAs resolve a number of errors and warnings associated with mismatched ELP Codes.

Ed-Fi Credential: Vendor Resources Bug Fix

There was a minor issue on the Vendor Resource page of WISEdata Portal. Vendors who wanted to add resources (slide decks, videos, other documentation) for their LEAs were not able to save their changes unless they added information into the ‘description’ field when the ‘description’ field is not required. This glitch was repaired, and resources can now be added and saved without needing to add information into the ‘description’ field.

WISEdash Updates

WISEdash for Districts

NSTR

WISEdash Public Portal

Turned over the ACT, PreACT Secure, Forward and DLM Assessment Data.

Turned over the PreACT Secure DPI Performance Dashboard with Student Detail and Student profile.

Fixed the listing of school years in the 'School Year' filter on Digital Equity dashboard to currently show a maximum school year of 2022-23. This is a temporary 'fix' while we rework our load processes to support the new Digital Equity survey structure. For more details, visit the DPI Internet Access Survey

at Home webpage, and scroll to the "Student Information System Data Submission" section.

Added the PreACT Secure to the list of assessments being shown in the Assessment Analysis dashboard.

Deploying Tuesday, August 22, 2023

Fixed the student detail list in the PreACT drill-down for the Average Score Graph, so that the student's score is showing.

Added the PreACT Secure to the Cohort Trends assessment graphic.

Changed the display of the Social Studies subject in the Forward Trends Dashboard, so that only 2021-2022 and 2022-2023 are displaying. This is because the standards for Social Studies changed in 2021-2022.

WISEadmin Portal and Other App Updates

WISEadmin Portal: PALS Assessment Export

The PALS assessments and PALS Online System was retired on June 30, 2023. As such, the opt in/opt out for PALS (*PALS-Illuminate Education*) has been removed from the Local Assessment Data Sharing Agreement in WISEadmin Portal, and the Local Assessment Exports in WISEadmin Portal.

KBAs for Validations

NEW! Warning 7473

This new warning throws when the student's school of primary enrollment submits an ELP Code of 7, and this does not align with the last submitted ELP Code. An ELP Code of 7 means that a student was never an EL student. But, if a student record has anything other than a 7 (i.e., 1-6) listed, this means the student either currently is or at some time has been an EL student. So, entering a 7 to indicate the student was 'never an EL' creates a mismatch of data.

Warning 6396

This rule was temporarily switched off for the 2023/24 SY to fix a bug. The warning was throwing when the middle name was left blank, and this is not a required field. The bug has been resolved and the rule will be turned back on again on Tuesday, August 22, 2023.

CST and Other WISE Webpage Updates

NEW! [Help Ticket Tips webpage](#) published!

UPDATED! The DPI [Digital Data Equity webpage](#) has the latest Internet Access Home Survey, available in Albanian, Arabic, Dari, English, Farsi, Spanish, Tamil and Telugu.

- Of Note: No requests were made for the survey to be translated into Hmong. If you need the Internet Home Access Survey translated into Hmong, please email [Rachel Schemelin](#). Please provide your name, the name of your LEA (school/district), and the language into which you need the survey translated.
