

## **L2 Validation Updates** -

- Warning [7191](#) and Error [7193](#) - Both of these L2s, connected to World Language, have been temporarily turned off until their Logic is updated. The updated Logic will reflect that these rules will not throw when the LEA is an Independent Charter School (ICS) or a County Children with Disability Education Board (CCDEB) facility. The changes for these L2 validations will apply to the 2022-23SY and after.

These changes in logic are based on [§118.40\(7\)\(b\)](#) for Independent Charter Schools which states that independent charter schools are exempt from chapters 115-121 unless the provision explicitly states that the statutory requirement applies. Authorization for CCDEBs exempt status comes from [§115.817](#). CCDEBs may offer world language learning to students for whom such learning is of interest and fits within their defined IEP and FAPE, but they are not required to do so.

- Error [7130](#) - This Error pertains to Wisconsin high school graduation plans with insufficient math credit requirements. Sometimes, schools will submit graduation plans for a 'graduating' (culminating) 8th grade class, which is not necessary. The logic for this Error is being adjusted to only apply to schools who offer grades 9-12. Schools who submit graduation plans for 8th graders (such as K-8 schools, or 6-8 middle schools) will not receive Error 7130, they will receive a different error - [7443](#) - which indicates that a graduation plan is not expected.
