

WISEdata Release Notes 10/31/23

WISEdata and Ed-Fi Updates –

Change ‘Career Pathways’ to ‘Clusters’

This label change is reflecting a name change so that consistent names and labels are reflected across platforms and areas in DPI. The new term ‘clusters’ will replace the term ‘career pathways’ for all current years in WISEdata Portal and will be visible on the Student Detail screen under the following headers:

- Roster panel
- School Roster details
- Programs > Career Education
- Career Education API View screen

Bug Fix: Certified/Not-Certified CTE Errors

The Career Education Certified/Non-Certified Career Education Programs Errors has been glitching depending on a student's enrollment type: primary or coursework.

- Grade levels are being pulled regardless of the student's enrollment type to help prevent glitches

Roster Export Renamed: “Sections – Student and Staff Count.”

The ‘Sections Missing Staff’ column on the Roster Export in WDP will be renamed to improve clarity because this column on the export displays more than just courses missing staff.

- The new column header will be “Sections – Student and Staff Count.”
- The new description will read, “ This export includes records at the school level, including the number of students and staff information associated with a course. The export displays all records with sections and counts associated with students and staff.
