

# WISEdata Release Notes 10/3/23

## WISEdata and Ed-Fi Updates –

### Critical Errors

On the WISEdata Portal (WDP) Agency menu, Validation Messages screen a new checkbox is being made available for Critical Errors. Checkboxes already exist for Errors and Warnings, but this new checkbox option will specifically display a list of critical errors.

As a reminder, critical errors are the most severe type of validation. All data corrections, for all types of validations, must and can only be corrected by the LEA within their student information system (SIS) vendor tool; WDP is a 'read-only' application.

- Critical errors are data that flowed from your SIS into WDP, but that cannot flow into WISEdash (also referred to as the data warehouse – DW). Snapshot data is retrieved from WISEdash, so critical errors must be resolved if this data is to be represented in an LEA's snapshot data. Once a snapshot occurs, the data in that snapshot cannot be edited.
- Errors are data that flowed from your SIS to WDP, but it doesn't look right. Errors may need to be resolved with the help of other LEAs (e.g., overlapping enrollments).
- Warnings are indicators of questionable data. Frequently, warnings will throw around "0" data or "100%" data (e.g., 100% perfect attendance, or zero discipline incidents). This data should be reviewed, as it could very well be correct. If it is correct, acknowledge the warning.

### Removing State Endorsed Regional Career Pathway Status

The "State Endorsed Regional Career Pathway Status" (SERCP) data element was deprecated upon completion of the 2019-20 school year. Since this data element has not been used for a number of years and is no longer relevant, it is being removed from the few places where it is still visible on WDP:

- WISEdata Portal Exports, "Validation Message – Other Programs": The column for SERCP is being removed from this export.
- CTE Program Ed-Fi API View & the User Interface: for the programs listed on a specific Student Detail screen.

### CTE Program Ed-Fi API View

This view only shows CTE program associations from your agency.

| Program Name                   | Program Type                   |
|--------------------------------|--------------------------------|
| Career and Technical Education | Career and Technical Education |

## Removing Export Type 'Possible Full-Term Dropout' and 'Possible Mid-Term Dropout'

The exports named are being removed from the WDP Exports section because they no longer exist. Additionally, LEAs use WISEdash to review this data, and Choice schools use the 'WISEdash Extracts' export to review this data.

| Exports         |                            |   |                          |                             |
|-----------------|----------------------------|---|--------------------------|-----------------------------|
| Category Type ↑ | Export Type ↑              | Description   | Code                     | Code                        |
| ChildCount      | Child Count                | Student enrollment records submitted by your district that cover the October 1 Child Count                                      | <a href="#">Download</a> | <a href="#">Definitions</a> |
| Discipline      | Discipline Action Export   | The details of the Student Discipline Actions that resulted from a Discipline Incident.   | <a href="#">Download</a> | <a href="#">Definitions</a> |
| Discipline      | Discipline Incident Export | The details of the Discipline Incidents and student behavior details from the Student Discipline Incident Behavior Association. | <a href="#">Download</a> | <a href="#">Definitions</a> |
| Dropout         | Possible full-term dropout | This Drop out export no longer exist and Public school must use WISEdash Extract for Dropouts                                   |                          |                             |
| Dropout         | Possible mid-term dropout  | This Drop out export no longer exist and Public school must use WISEdash Extract for Dropouts                                   |                          |                             |

## Bug Fix

A bug was preventing Third Friday in September (TFS) data from flowing into the data warehouse. A fix was put in place and LEAs should now be able to view this data.
