

WISEdata Release Notes 8/8/23

WISEdata and Ed-Fi Updates –

Braille Courses No Longer a Part of World Language Category of Courses

Braille courses are an extremely important part of teaching literacy, as they are a vital tool to support access to reading for our blind and visually impaired students. However, all braille courses offered within our Wisconsin school system are in English, and, thereby, only support reading in the English language.

For this reason, for the 2023-24 school year and going forward, DPI is removing the World Language (WL) category descriptor (SCED 'Subject Area' 24) from the following courses:

Roster Code	Title	Subject Area	Rigor Level	World Language Category	SCED 9
12102	Braille	24	No Specified Level	Braille	24041X
12103	Braille	24	Honors	Braille	24041H
12104	Braille	24	General or Regular	Braille	24041G
12105	Braille	24	Enriched or Advanced	Braille	24041E
12106	Braille	24	Basic or Remedial	Braille	24041B

New Language Courses Identified in 2023-24 Course List

A number of Indigenous languages are newly available for the 2023-24 school year: Hmong, Hocak, Ojibwe, Oneida, Potawatomi, Menominee, and Mohican. You can find these new courses on the [Courses data element](#)

[page](#). This webpage allows you to either download a .csv file of all courses (there are A LOT!!) or to search via an interactive web tool. To find the courses easily using the interactive web tool, set the following filters:

- Subject Area: 24 - World Languages
- SCED 10: 24989G
