WISEdata Release Notes 3/21/23

WISEid Updates

WISEid: Change Request Birth Date Warning

Issues with Enrollment

"Change Request, Show Birth Date" warnings will display for all users for when a person's birth date change is out of range of their last enrollment. This warning displays when the proposed birth date change doesn't match what we would expect the person's most recent student
enrollment. You should verify this is the correct person and the correct birth date. Previously only DPI could see this.

If you are a user who also has WISEdata Portal access, show Enrollments section with student enrollment history on the Change Request. Helpful to determine if you are updating the correct person's WISEid. Previously only DPI could see this.

For Persons Under Age 18 With Staff Assignments

For all users, "Change Request, Show Birth Date" warnings will throw when the proposed birth date change is under 18 years old, and this person has a staff assignment/s. In rare cases some staff are under 18 years old. You should verify this is the correct person and person is really under 18 years old. If so, ignore the warning. Previously only DPI could see this.

For all users show Staff Assignments section if the person has any. Helpful to determine if you are updating the correct person's WISEid. Previously only DPI could see this.
