

# WISE Application Release Notes 12/6/2023

## WISEid Updates

### **WISEid: Remove Final Student Email Uniqueness Check on Person Uploads**

The final check for student email uniqueness within the Person Upload tool is being removed. Emails are reused over time in some districts and WISEid did not have a way to measure the timespan between when an email was repeated and issued to a different user, and the repetitions caused confusion within the system. The collection of student emails will be removed from WISEid for the 2024-25 school year. This makes updating student emails in WISEid an unnecessary task, so you don't need to spend any time this year updating student emails in WISEid.

## WISEstaff Updates

### **WISEstaff: Easy Way to Mark All Contracts Salary Final for Year**

Buttons associated with the "Contract Is Salary Final?" question are now preset to "Yes" for all records. This new setting appears in two different places on WISEstaff for your convenience:

- On Upload Staff Data page when the blue 'Contract Upload' type button is chosen.
- On Staff Collection Checklist page step 3c red button to update all current year Contract records to Y for is salary final question. Button only appears when you have any Contracts not set to yes for the current year otherwise button is hidden.

### **WISEstaff: Speed up Performance of the Data Quality Dashboard Widgets for Expiring Background Checks and Expiring Staff Licenses**

We have improved the speed of both of these widgets by means of a mechanism that caches licensing data.

### **WISEstaff: Update Checklist Help Content for New Audit Reports**

The Staff Collection Checklist, Steps 3 & 4, now display updated Help content for the new audit report info. **NOTE:** The actual audit reports are **not ready yet**, but the Help info has been added.

### **WISEstaff: Hotfix - Some Districts Can't Preliminarily Certify**

We released a hotfix on 11/15/23 to repair a preliminary certification block caused by unrequired validations that were unresolved.
