

WISEdata Release Notes 1/19/23

WISEid Updates

WISEid: Remove Deletion of Other Names for LEAs in UI

Disabled the deletion of Other Names in WISEid by LEAs. If you need any Other Names deleted due to mistakes you will need to submit a support ticket. We need previous legal names to remain in Other Names so the person can be found by more recent enrollment LEAs. Otherwise it will result in duplicate WISEids and likely incorrect counting of drop outs. We had previously said for special circumstance changes to names the Other Names they could be removed but found that will cause the issues above so we can't allow that. If you incorrectly added an Other Name to the wrong person then please submit a Help Ticket to have it removed. In the future when we have time we will create a Change Request to DPI for this type of change.

[WISEid] Merge Selecting of Local Person IDs to Survive Broken

When DPI processes merges when the a Local Person ID was chosen not to be moved from the deactivated WISEid to the surviving WISEid it was not taking effect. We have fixed this issue.
