

# WISEid/staff Notes 9/5/2023

## WISEid Updates

### **WISEid PRIORITY: Removing Unique Student Email Validations**

The “student unique email” validation was removed entirely from the WISEid system. This change includes the following areas in the WISEid application:

Person Edit  
Person Upload and  
Identity API.

In 2024-25 we plan to remove the collection of student emails from WISEid. This makes updating student emails in WISEid an unnecessary task, so you don't need to spend any time this year updating student emails in WISEid. One less thing to do!

### **WISEid: Match Review Bug Fix**

Occasionally, valid matches would not display when doing Match Review or person search during early morning hours. We discovered that an early morning reindex process was causing the issue. The bug was fixed.

## WISEstaff Updates

### **WISEstaff: Update Staff Collection Checklist Section 2 and 3**

The Staff Collection Checklist was updated so that only *licensed* assignments are required for preliminary certification. Contracts are no longer required for the preliminary certification.

### **WISEstaff: Remove Contract Related Validations from Preliminary Certification**

Since the preliminary certification was changed to no longer include contracts and non-licensed assignments, the corresponding validation messages were also removed as a requirement to certify. This allows for LEAs to focus on validations for the licensed assignments prior to the preliminary audit.

### **WISEstaff: Remove Deleted Licenses from Expiring Staff Licenses**

To avoid confusion, we are omitting licenses that were deleted from the ELO system. We removed all licenses with the status, “Deleted Application & License.” However, we found there are other licenses that have a differently worded license status that are also no longer valid. In a future release we will remove the rest of the deleted licenses.

### **WISEstaff: Update Notifications Logic**

Part of 23-24 changes to the WISEstaff system allows districts to certify for the preliminary snapshot with only licensed assignments. The logic governing this change will be checked to send out Preliminary Certification Checklist Progress reminder notification emails.

### **WISEstaff: Data Quality Dashboard, Some Staff Omitted from Statewide Comparison of Average Teacher Salaries**

A bug was fixed for staff with multiple assignments that added up to .95 FTE. These staff were being omitted from the both district and statewide Average Teacher Salaries widget, as well as from the Public Staff Report - Public Teacher Salary Report. These staff are now being represented accurately in these reports.

### **WISEstaff: Public Staff Reports: Update Link to Archived Data in Public Staff Reports Header**

We updated the link to archived data on the top of the Public Staff Reports. The link is now named, "Historical Staff Data: Prior to 2017."
