

**Release Notes for 4/24/2018 WISEid/WISEstaff  
Production Release  
(Core Apps Team Sprint 158 2-Week Work Cycle)**

<b>Feature Title</b>	<b>Notes</b>
<b>WISEid/WISEstaff:</b> HOTFIX--Sample upload template file now accessible in production	We fixed an issue where the Upload page template files were not functioning.
<b>WISEid/WISEstaff:</b> Requesting Agency and Dependent Agency Filters now working	On the Message and Change Requests page, the filters for Requesting Agency and Dependent Agency were broken, but this was resolved.
<b>WISEid:</b> Added logging during Person Upload update process	We added more logging, so when Person Uploads fail, we can see more quickly the source of the issue to resolve.
<b>WISEid:</b> During WISEid merges, Birth info moves to the active record when active value is null.	We fixed an issue and cleaned up data for when WISEids are merged. The surviving WISEid doesn't have birth location fields, so they are populated from the deactivated WISEid during the merge process. This is done field by field. For example, if the deactivated WISEid has Birth City populated, but the active version doesn't, the Birth City of the active WISEid is updated to display what the deactivated record had. This process is done for each birth location field independently.
<b>WISEid:</b> Fixed error message when entering invalid character in Parent 1 First Name Field	We fixed an issue on the Create Person screen where if you put invalid characters in the Parent 1 First Name

	field, instead of giving an invalid characters error, the screen will state the name can't exceed 50 characters.
<b>WISEid:</b> HOTFIX--Fixed Change Request job issues, fixed missing person edit validations, and removed corrupt records	We fixed a variety of incorrect Change Request and missing validation issues.
<b>WISEid:</b> HOTFIX--Milwaukee and Waukesha files no longer faulting	We upgraded the database server to handle large district uploads. There is still another issue allowing only one big upload at a time in the queue. That will be fixed in the next release.
<b>WISEid:</b> Parent/Guardian duplicate upload issue resolved	We had an issue where multiple of the same parent guardians were allowed via Person Upload, but this was fixed.
<b>WISEstaff:</b> Corrected Validation for assignment 96-0891	We fixed validation for Early Childhood assignment 96-0891, so it requires correct grades when submitted.
<b>WISEstaff:</b> Entity ID disappearance act	Previously, there was an issue in the UI when if you submitted a Change Request for an already populated Entity ID, the populated Entity ID would disappear when you submitted the Change Request. The Entity ID was still there, but it was hidden in the UI unless you refreshed the page. This has been corrected now.
<b>WISEstaff:</b> HOTFIX--96-0891 no longer removing valid K4, KG, PK grades when it shouldn't	We fixed the Clear Non-Required data proces when grades were out of range of K4, KG, PK. There may still be an issue with this, as it has been found we should have allowed K3. We will have to fix this in the near future.
