

## WISEdata Release Notes: 3/15/18

Title	Description/Comments
<b>API:</b> Other no longer Gender option	We removed the O, Other, code option for the Gender demographic field in WISEdata. Schools with students who previously had an O code may be contacted by DPI staff about updating the field.
<b>WDP:</b> Bug Fix--Validations 6626 and 6395 appear in the correct section of the Student Details screen.	The L2 validation 6626 error message should be thrown in the Student panel in the Student Details screen of WISEdata Portal, but it was throwing in the Enrollment Section. The same thing was happening for Warning 6395, but these validations have been fixed and now appear in the correct spot.
<b>WDP:</b> Metrics now display total counts.	We've enhanced the WISEdata Portal metrics screen to show a total count for each metric tied to a collection. Previously, the districts had to total each metric manually to get the total for the district for the collection. We've labeled the updated metrics to explicitly explain the metric info.
<b>WDP:</b> KBA links are in front of validation messages when displayed in the portal.	We created a link to validation KBAs that is now more visible to users. Now the link leads off each validation message in the portal.
<b>WDP:</b> School Type and School filters carry over to all pages.	The WISEdata Portal was having issues maintaining the School Type and School filters across pages, but this was resolved.
	*There is still a great deal of work happening behind the scenes in developing Roster for CTE and CCR work, as well as in moving to SCED 5.0 for 2018-19 SY.
