Certified student data now available on DPI's WISEdash Public Portal

Update includes 2022-23 graduation, attendance rates, and 2023-24 certified enrollment data

MADISON – The Wisconsin Department of Public Instruction today published updated student data that is now available on its [on its WISEdash Public Portal](#).

The information published today includes 2023-24 certified enrollment data for public and private schools and certified data on public school graduation rates, attendance and absenteeism, career and technical education participation, and more for the 2022-23 school year.

Each year, all Wisconsin public school districts and independent charter schools collect information about their students, staff, and courses based on federal and state reporting requirements. These datasets are submitted to the DPI and are stored and linked in a data warehouse. [The DPI's WISEdash Public Portal](#) uses dashboards, or visual collections of graphs and tables, to provide multi-year educational data about Wisconsin schools and students. Data on the portal are redacted and available by school, district, or state. Data can be displayed for multiple years and can also be grouped and filtered by a variety of demographics, including grade level, gender, race/ethnicity, economic status, disability, English proficiency, and migrant status. For more information, [visit the Wisconsin DPI's website](#).
